 Phone (03) 8769 7300 Email - customerservice@endless.com.au

**Measurements in mm**

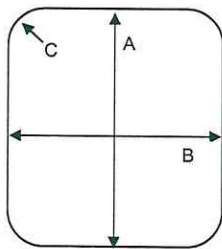

Length (A)

Width (B)

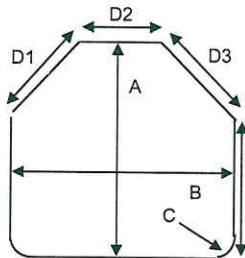

Height of Lip \*\*refer page 3-skirt length

Radius round corner (C)

Length Of Sides  
 (D1)  (D2)  (D3)  (D4)

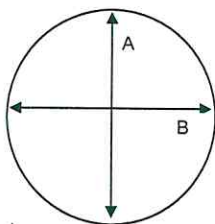

Mark the position of any controls over 2.4 cm high (if any) from a projected corner to the centre of each button.

Please note: Always measure from the very outside of your spa, the lip occasionally flares out.

Measure the length of a side when corners are rounded by making a projected corner using two straight edges and measure from there to the other projected corner.

Measure radius of corners (C) by measuring from a projected corner back to where the spa touches the straight edge. (see diagram 1)

**Make and model if known**

**Colour:** Espresso  Slate Grey  Diamond Grey   
 Sandstone  Sea Blue  Outback Tan   
 Moss Green

**Skirt required** YES / NO **Straps required** YES / NO

**High wind area** YES / NO (extra options are available- costs apply)

## MEASURING WIDTH AND LENGTH OF SPA (A & B)

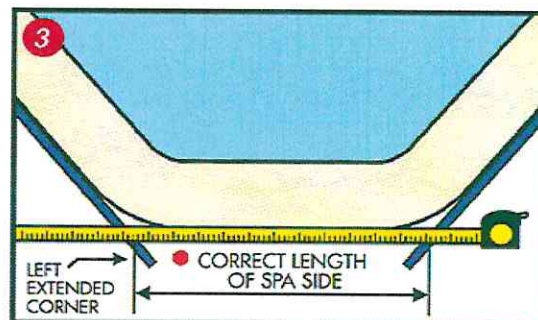

You must Measure the Spa Width from outside to outside edge, using an upright ruler to allow for any flares in the lid.

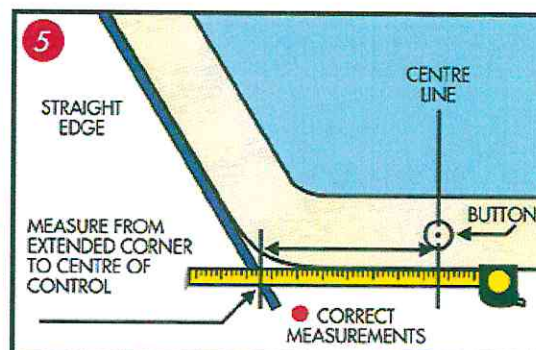

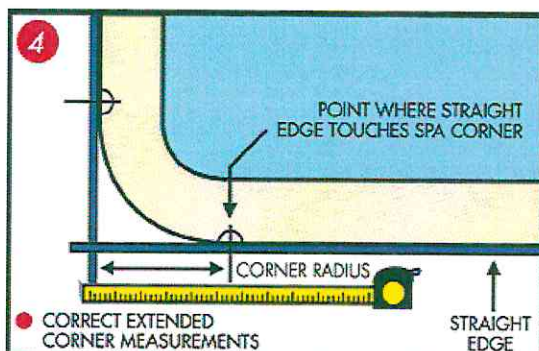

### HEIGHT OF LIP (C)

### LENGTH OF SIDES (D1, D2, D3, D4) FOR OCTAGONAL SPAS

### RADIPOSITION OF CONTROLS

## MEASUREMENTS THAT ARE REQUIRED:

**Length and width** (ensure that both these measurements are checked, even if they look the same it is vital that each is measured individually). This also applies to the round spas.  
(Refer to Diagram 1.)

**Height of the lip** is also a most important measurement that need to be accurate.  
(Refer to Diagram 2.)

**Length of Sides** A spa with more than 4 sides will need each side accurately measured.  
(Refer to Diagram 3.)

**Radius of the corners** this measurement applies to spas that have rounded corners.  
(Refer to Diagram 4.)

**Position of controls** need to be measured as well if they exceed 24mm in height, this allows the foam core of the spa cover to be modified to fit over the controls. (Refer to Diagram 5.)

## MEASURING TOOLS YOU WILL NEED

1. A measuring tape with metric rule.
2. A minimum of two straight edges that are at least one metre long.
3. Somebody to help you measure as the measurements need to be totally accurate.

## DEFINITION OF AN EXTENDED CORNER

When a spa has a curved corner, the extended corner is where the sides would meet had the corner been straight.

## HIGH WIND AREAS

Where the spa is installed in an area prone to high wind, it is recommended extra straps be added

## SKIRT

The skirt is the flap attached to the cover which falls down from the cover to protect the spa shell.

## SKIRT LENGTH

There is now a standard length of 120mm for the skirt length.  
Alterations to shorten or lengthen the skirt will incur an additional fee.

# Measuring Sheet – Octagon

Name: \_\_\_\_\_

PO Number: \_\_\_\_\_

Phone: \_\_\_\_\_

Is Delivery Required: Yes/No

Address: \_\_\_\_\_

## About your spa:

A: \_\_\_\_\_ mm

B: \_\_\_\_\_ mm

When measuring D1-D4 do not measure to where the straight ends, but instead measure out to the projected middle of the curve (see image below). Please be as accurate as possible (to the mm) the first time otherwise we may require you to remeasure.

D1: \_\_\_\_\_ mm

D2: \_\_\_\_\_ mm

D3: \_\_\_\_\_ mm

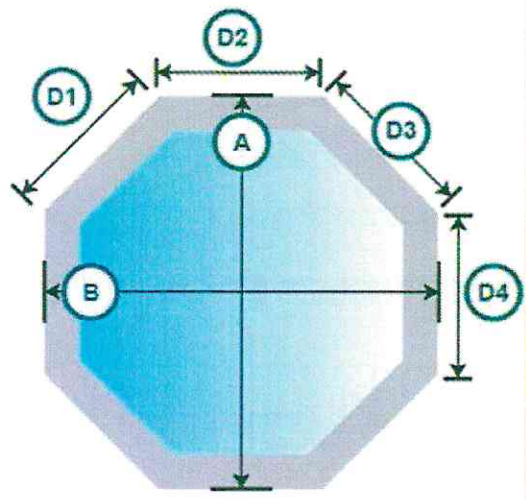

D4: \_\_\_\_\_ mm

Skirt: \_\_\_\_\_ mm

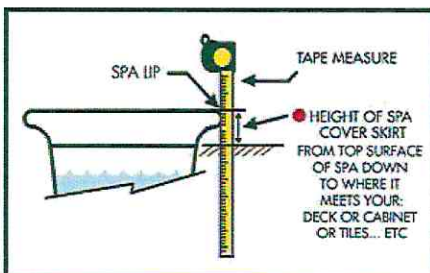

Colour: \_\_\_\_\_ Locks: Yes/No

Spa Make (if known): \_\_\_\_\_

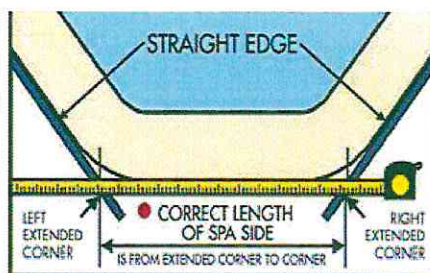

Spa Model (if known): \_\_\_\_\_

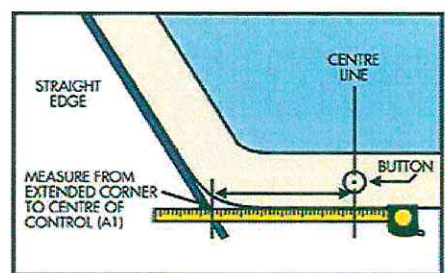

## Skirt:

## D1-D4 Measuring:

## D1-D4 Measuring:

What style of cover would you like? (please circle) Contour / Endurance / Performer

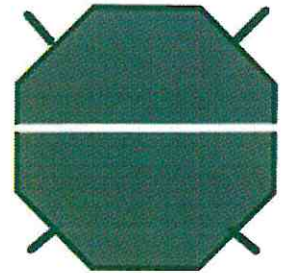

We recommend the Contour for normal suburban life. Our Performer cover gives you a little extra security if the cover does happen to have a weight placed on it accidentally. Our Endurance cover is recommended for snow or high wind areas.

Do you have control buttons on the top lip of your spa?

No or Raised less than 25mm  Yes Raised more than 25mm

**Strap Placement –**

Standard placement shown in Diagram 1 if a variation is required please supply diagram (extra charges may apply). Note: We will not do exact measurement locations. New female clips to will also be provided to attach to deck or spa.

**OCTAGONAL 2 PIECE**

**Standard Skirt Length –**

Standard skirt length is 120mm (if you require above this additional charges will apply)

All covers are cut across the short to strengthen the long. See Diagram 1
